Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, requires businesses to provide a clear and reasonable warning before knowingly and intentionally exposing anyone to chemicals that are known to cause cancer or birth defects or other reproductive harm. It is important to know that a product that receives certification from the United States Food and Drug Administration, or another federal agency or state agency, is not necessarily exempt from California requirements for chemical exposure warnings. Businesses should be aware of the levels of harmful chemicals in their products and of applicable Proposition 65 requirements.
